

FCC SELLS EYSA FOR 115 MILLION EURO

- THE SALE OF EYSA, FCC'S CAR PARK SUBSIDIARY, IS PART OF THE CITIZEN SERVICES GROUP'S ACTIVE PORTFOLIO MANAGEMENT STRATEGY

Madrid, 29 July 2011.- FCC has agreed to sell Estacionamientos y Servicios, S.A. (EYSA) to funds managed by N+1 Private Equity (Dinamia and N+1 Private Equity Fund II) for 115 million euro. EYSA provides services such as on-street car park management, vehicle tow and impoundment, and development of computer applications for processing traffic fines.

It manages over 120,000 on-street parking spaces in 60 Spanish cities and provides vehicle tow-away services in 18 of them. In 2010, EYSA obtained new contracts in San Sebastián, Salamanca, Benicàssim and Huéscar-Overa.

The agreement is subject to certain conditions precedent, such as approval by the competition authorities, and is the result of dynamic portfolio management by FCC, which includes divesting non-core businesses and allocating the funds to core businesses: environmental services, infrastructure and energy. More than 60% of EBITDA came from Environmental Services and Energy activities in the first half of 2011.

The sale of the on-street car park business will enable FCC to reduce its financial debt, which is one of the company's main objectives in the current economic situation. In the first half of 2011, financial debt declined by 3% year-on-year.

FCC will exit the car park business entirely as a result of this divestment. In July 2010, Mutua Madrileña acquired 31 FCC underground car parks (10,500 spaces) for 120 million euro.

FCC Citizen Services

FCC is a Citizen Services group with revenues of over 12 billion euro. Its main areas of activity are management of environmental and urban services (household and industrial waste, street cleaning and maintenance, park and garden maintenance, urban furniture and end-to-end water management), design and construction of infrastructure and social amenities, and development of renewable energies. The group, whose main shareholder is Esther Koplowitz, employs 90,000 people in 54 countries.
